

## Mission Statement

---

Our vision is to be the contractor and developer of choice for our clients by delivering added value through quality and sustainability.

We pride ourselves in achieving our vision through establishing unique stakeholder relationships, meeting & exceeding our client expectation & by creating a team that is committed to personal development & growth.

We understand the industry we are in is not easy, far from it. Challenging markets, planning disruption & construction costs are to name a few of the issues we face in our sector. However, Western Mane thrives under pressure. We champion problem solving & are well equipped to tackle the diverse range of challenges that come our way as we undertake a project.

What inspires us is to build. Build homes, build places of work & most importantly build relationships. Establishing relationships ignites our passion for what we do. We are privileged to work with an array of people from numerous fields & professions. From solicitors to bricklayers, development agents to planning consultants, collaboration is at the very heart of our mission compass.

Our investors drive us to do what we do at Western Mane. Delivering the most competitive returns & highest quality of product to our stakeholders & end users is our primary objective. Acting with integrity, honesty & humility is what continues to provide a fruitful working relationship with our investors. We believe relationships are for the long haul and beyond just a project or venture. Maintaining & enhancing that relationship is of the utmost importance.

We positively transform the urban landscape by developing, owning, and investing in real estate in the greater North West/West London market.

Hussain Al-Najafi
